The Company will continue its efforts to achieve a sustainable, steadily increasing dividend over the longer term, with a view to generating the best possible returns for shareholders.

LOOKING TO THE FUTURE

Looking to the future, the rapid growth of the Chinese economy and the rise of Chinese residents' consumption power have resulted in an increasing demand for mobile telecommunications products and services. The development of China's rural economy has driven the development of the mobile telecommunications market in rural areas, thereby bringing new opportunities for the Company's market expansion. The accelerated development in China's "informationalization" has created tremendous demand for mobile telecommunications businesses, and the potential of China's mobile telecommunications market remains enormous. However, the ever-increasing technological advancement and the globalization process bring business opportunities as well as challenges. The deepening of the reform in the national telecommunications industry and the issuance of 3G licences in China may result in substantial changes in the industry and the competitive environment.

An outstanding enterprise should be equipped with strong capabilities to face adversities and tolerate risks. It should strengthen its advantages, emphasize fundamental management, strategic management and human resources training and cultivate corporate culture. It should also encourage innovative thinking, swiftly adjust and adapt itself to the changing environment, make the best use of the situation and turn adversities into opportunities.

In the face of opportunities as well as challenges, the Group will persist in its strategic positioning as a "Mobile Information Expert", leverage its economies of scale, focus on premium quality, actively seek opportunities for expansion and growth and constantly promote innovations so as to maintain sustainable development. The Group also intends to enhance its overall strengths and maintain a favorable environment in the industry, with a view to achieving harmonious development. As the only mobile telecommunications services partner for the 2008 Beijing Olympics, the Group will make all efforts to ensure the provision of premium quality mobile telecommunications services. At the same time, the Group will actively carry out preparatory work for the future, including preparation for the next generation mobile telecommunications network and technologies, and will actively explore new mobile multi-media products. The Group seeks to ensure the continued viability of the driving forces behind its sustained development, to extend its momentum of healthy and continuous development and to maintain a long-term, solid business foundation, with a view to bringing better returns for its investors.
