

China Mobile (Hong Kong) Limited Announces 23.9 Million Subscribers As Of September 20, 2000

China Mobile (Hong Kong) Limited ("CMHK") today announced that as of September 20, 2000, its subscribers had reached 23.9 million. This reflects a net addition of approximately 0.52 million subscribers from July 1 to July 20, 0.73 million subscribers from July 21 to August 20, and 1.04 million subscribers from August 21 to September 20.

Except for the months of June and December, CMHK's monthly subscribers net addition numbers are typically reported as of the end of its billing period, which is the 20th day of every month. For June and December, the number of net additions is reported as of the end of the calendar month, in order to be consistent with CMHK's accounting reporting period. Accordingly, subscriber net additions reported for June and December typically reflect results for a 40-day period, from the 21st day of the preceding calendar month to the end of June and December, as the case may be. Subscriber net additions reported for July and January typically reflect results of a 20-day period, from the first day to the 21st day of such month. Subscriber net additions reported for all other months reflect results of a full month period of operations.

CMHK believes that the pattern of subscriber net additions in July, August and September 2000 is consistent with CMHK's experiences in the past. In particular, July and August tend to have a lower net addition of subscribers.
