## **Section 1 – Conflict Minerals Disclosure**

### **Item 1.01 Conflict Minerals Disclosure and Report**

#### **Conflict Minerals Disclosure**

China Mobile Limited (“China Mobile”) is filing a Conflict Minerals Report, attached as Exhibit 1.01 to this Form SD. China Mobile has also posted the Conflict Minerals Report to its corporate website at <http://www.chinamobileltd.com/en/ir/sec.php>. The content of such website is not a part of this Form SD. The reasonable country of origin and due diligence procedures employed by China Mobile, and the results thereof, are described in the Conflict Minerals Report, which report is incorporated into this Item 1.01 by reference.

#### **Item 1.02 Exhibit**

China Mobile has filed, as an exhibit to this Form SD, the Conflict Minerals Report required by Item 1.01.

## **Section 2 – Exhibits**

### **Item 2.01 Exhibits**

The following exhibit is filed as part of this Form:

**EXHIBIT 1.01 – CONFLICT MINERALS REPORT**, as required by Items 1.01 and 1.02 of this Form.

## SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

CHINA MOBILE LIMITED  
(Registrant)

By: /s/ LI Yue  
LI Yue  
Executive Director and  
Chief Executive Officer

Date: May 26, 2016

**EXHIBIT 1.01 – CONFLICT MINERALS REPORT****China Mobile Limited  
Conflict Minerals Report  
For The Year Ended December 31, 2015**

This Conflict Minerals Report for China Mobile Limited (together with its consolidated subsidiaries, “China Mobile,” “we,” or “our”) is provided in accordance with Rule 13p-1 under the Securities Exchange Act of 1934, as amended (“Rule 13p-1”), for the reporting period from January 1 to December 31, 2015 (the “Reporting Period”).

**I. Background****A. Identification of Products Containing Conflict Minerals**

Section 1502 of the Dodd-Frank Wall Street Reform and Consumer Protection Act and the rules promulgated by the United States Securities and Exchange Commission (“SEC”) thereunder (collectively, the “Conflict Minerals Rule”) impose disclosure and due diligence requirements on SEC-reporting issuers that manufacture or contract to manufacture products that contain “conflict minerals” that are necessary to the functionality or production of those products. Conflict minerals are defined under the Conflict Minerals Rule to include tin, tantalum, tungsten and gold.

China Mobile is a telecommunications services provider, operating mainly in the People’s Republic of China. In its ordinary course of business, China Mobile and its subsidiaries engage in the sale of certain telecommunications equipment and terminals (“Products”). No Products are manufactured by China Mobile, but some Products are contracted by China Mobile Group Device Company Limited (“China Mobile Device”), a wholly-owned subsidiary of China Mobile, to be manufactured by third parties. See “Product Description”. China Mobile has determined that “conflict minerals” (also referred to herein as “3TG”) are necessary to the functionality or production of certain Products contracted by China Mobile to be manufactured, on or after January 1, 2015.

**B. Reasonable Country of Origin Inquiry**

China Mobile has conducted an inquiry that was designed to determine whether any of the 3TG in Products originated in the Democratic Republic of the Congo (the “DRC”) or an adjoining country as defined in the instructions to Form SD (collectively together with the DRC, the “Covered Countries”) or is from recycled or scrap sources. If, based on such inquiry, China Mobile knows or has reason to believe that any of the necessary conflict minerals contained in Products originated or may have originated in a Covered Country, and knows or has reason to believe that those necessary conflict minerals may not be solely from recycled or scrap sources, China Mobile will conduct due diligence to determine if the necessary conflict minerals contained in those Products did or did not directly or indirectly finance or benefit armed groups in the Covered Countries. Products which do not contain necessary conflict minerals that directly or indirectly finance or benefit armed groups in the Covered Countries are considered “DRC conflict free” by China Mobile after conducting its due diligence. As China Mobile is a downstream supplier of finished products and does not purchase from, and has no established commercial relationships with, smelters or refiners of conflict minerals, China Mobile’s reasonable country of origin inquiry (“RCOI”) focused on its direct suppliers. China Mobile was able to identify all of its direct suppliers of Products containing 3TG that have been contracted by China Mobile to be manufactured by third parties. There were five such direct suppliers during the Reporting Period.

For the RCOI survey, China Mobile adopted the Conflict Minerals Reporting Template (the “Conflict Minerals Reporting Template”) published by the Conflict-Free Sourcing Initiative (“CFSI”). China Mobile sent the template to the five identified direct suppliers and received responses from all five suppliers. China Mobile further compared the names of the smelters and refiners identified in such responses against the CFSI Smelter Reference List and the list of smelters that have received a “conflict free” designation from the Conflict Free Smelter Program (“CFSP”) of CFSI (“CFSP-compliant Smelter List”) to determine whether any of the conflict minerals might originate in a Covered Country. From the result of the RCOI survey, we did not obtain knowledge that any conflict minerals used in Products originated in a Covered Country and are not from recycled or scrap sources, but there was a risk that conflict minerals used in Products may have originated in a Covered Country and that they may not be from recycled or scrap sources. Accordingly, as required by Item 1.01(c) of Form SD, we conducted due diligence on the source and chain of custody of the conflict minerals contained in Products supplied to us by our direct suppliers for the Reporting Period.

## **II. Due Diligence**

### **A. Design of Due Diligence**

China Mobile has undertaken measures to exercise due diligence on the source and chain of custody of the 3TG in Products. China Mobile’s conflict minerals due diligence measures are being designed in conformance with the Organisation for Economic Co-operation and Development Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas, Second Edition (2013) (the “OECD Guidance”), an internationally recognized due diligence framework, as applicable for tin, tantalum, tungsten, gold and “downstream companies,” as such term is defined in the OECD Guidance.

The OECD Guidance sets forth the following five steps for establishing a responsible supply chain: (i) establishing strong company management systems, (ii) identifying and assessing risks in the supply chain, (iii) designing and implementing a strategy to respond to identified risks, (iv) carrying out independent third party audit of supply chain due diligence at identified points in the supply chain, and (v) reporting annually on supply chain due diligence.

### **B. Due Diligence Measures**

- (i) Establish strong company management systems:
  - a. China Mobile adopted a Policy for a Responsible Supply chain of Conflict Minerals as well as guidelines for conflict minerals due diligence procedures in 2016. The policy sets forth China Mobile’s goal to procure and use materials free from conflict minerals originated from Covered Countries and to achieve such goal by conducting source-tracing supply chain inquiries and strengthening cooperation with suppliers. The guidelines lay out certain detailed steps and specific measures China Mobile is required to undertake to carry out conflict minerals due diligence.
  - b. Since February 2016, the discipline, inspection and audit department of China Mobile Device has become a member of the conflict minerals working group and led the relevant due diligence work in order to streamline the conflict minerals due diligence procedures. In addition, since February 2016, conflict minerals research briefings have become part of the regular agenda at the general managers’ meeting and the reports of briefings are submitted regularly for the review and approval by the management of China Mobile Device. China Mobile also intends to establish an internal committee for conflict minerals in 2016. The internal committee for conflict minerals will comprise individuals from various areas within the company, including personnel from China Mobile’s Legal Department and personnel involved in China Mobile’s supply chain processes, and will supervise and enforce the supply chain due diligence process.
  - c. China Mobile gathers information using the CFSI Conflict Minerals Reporting Template sent to its direct suppliers to determine the chain of custody of 3TG contained in Products.

- d. China Mobile Device communicated and will continue to communicate to its suppliers that China Mobile based on its policy does not purchase nor support use of conflict minerals originated in Covered Countries, and required its suppliers not to purchase conflict minerals originated in Covered Countries and to commit to extend such requirement to their suppliers. Since June 2015, China Mobile Device has incorporated a term on conflict minerals into the standard template for supplier contracts and all the supplier contracts China Mobile Device entered into after June 2015 include and will include such a term whereby the suppliers represent that their products and packaging do not contain any conflict minerals originated in any Covered Country.
  - e. China Mobile communicated with and educated China Mobile group companies and suppliers regarding the SEC conflict minerals disclosure requirements and China Mobile's conflict minerals policy. China Mobile will also communicate its guidelines for conflict minerals due diligence procedures to China Mobile group companies.
- (ii) Identify and assess risks in the supply chain:
- a. China Mobile Device is an entity engaging in the procurement and distribution of mobile telephones, tablets and other devices. China Mobile has requested the direct suppliers from which China Mobile Device procured any Product containing 3TG that have been contracted by China Mobile to be manufactured by third parties to respond to the supply chain survey.
  - b. China Mobile adopted the Conflict Minerals Reporting Template published by CFSI for purposes of the supply chain survey. China Mobile followed up with direct suppliers to obtain complete responses to the supply chain survey, verified the collected responses, and inquired about any discrepancies in the response provided. The status of the supply chain survey and due diligence has been reported to China Mobile's Legal Department, which is considering actions to mitigate the supply chain risks identified, such as those described in "– Risk Mitigation Steps China Mobile Will Take". In assessing the risk to its supply chain, China Mobile concluded that because suppliers of certain Products containing 3TG provided incomplete information regarding metal origins and conflict-free sourcing, there was risk that the 3TG may have originated in the Covered Countries and may not have originated from recycled or scrap sources.
- (iii) Design and implement a strategy to respond to identified risks:
- a. In accordance with China Mobile's guidelines for conflict minerals due diligence procedures, findings of the supply chain risk assessment are reported to the designated senior management of China Mobile.
  - b. To evaluate and respond to identified risks, China Mobile relies on the suppliers' responses to the Conflict Minerals Reporting Template, CFSI Smelter Reference List and the CFSP-compliant Smelter List. Since 2015, China Mobile has compared the names of the smelters and refiners identified in such responses against the CFSI Smelter Reference List and the CFSP-compliant Smelter List to identify the smelters and refiners that had not received a "conflict free" designation from CFSP and followed up with the suppliers to obtain further information on the identified smelters and refiners.
  - c. Pursuant to its Policy for a Responsible Supply chain of Conflict Minerals and its guidelines for conflict minerals due diligence procedures, China Mobile plans to adopt a risk management plan combining a number of measures, such as temporarily suspending trade in order to achieve measurable risk mitigation, terminating its relationship with a supplier after risk mitigation attempts fail or where risk mitigation is not feasible, and terminating as soon as commercially practicable a procurement plan if China Mobile becomes aware of any procured material containing conflict minerals originated from Covered Countries.

- d. China Mobile has obtained an independent private sector audit of this report, in accordance with the Conflict Minerals Rule.
- (iv) Carry out independent third party audit of supply chain due diligence at identified points in the supply chain:
  - a. As a downstream supplier of finished products, China Mobile has no direct commercial relationships with smelters. In addition, for production completed during the Reporting Period, China Mobile did not receive sufficient information from its direct suppliers regarding the identity of smelters from which the minerals were derived.
  - b. China Mobile intends to participate in relevant industry groups to accumulate knowledge on and improve industry best practices on supply chain due diligence.
- (v) Report annually on supply chain due diligence:
  - a. China Mobile is reporting annually on its supply chain due diligence by preparing this Conflict Minerals Report to disclose the description of the measures taken to determine the source and chain of custody of any of the necessary conflict minerals contained in China Mobile's products, as well as the results of China Mobile's due diligence. This Conflict Minerals Report is available on China Mobile's corporate website (<http://www.chinamobiletd.com/en/ir/sec.php>). The information contained in such website is not a part of this Form SD.

### **C. Risk Mitigation Steps China Mobile Will Take**

The due diligence process discussed above is an ongoing process. At this time, China Mobile intends to take the following actions to improve the due diligence conducted to further mitigate any risk that conflict minerals in Products necessary to the functionality or production of Products could benefit or finance armed groups in the Covered Countries.

- (i) China Mobile intends to participate in relevant industry groups to define and improve industry best practices and improve China Mobile's influence and leverage over the supply chain in accordance with the OECD Guidance.
- (ii) China Mobile will continue to work with its direct suppliers and direct them to obtain responses from all lower tier suppliers subject to the RCOI survey, and to improve the content of the RCOI survey responses.
- (iii) China Mobile will communicate its policy regarding conflict minerals to its suppliers and will strive to incorporate such policy into future contract terms and specifications with its suppliers. China Mobile will also explain the procedures of its RCOI survey in the supplier meetings and request suppliers to cooperate with its effort to identify the source of the necessary conflict minerals.

### **III. Product Description**

Based on the due diligence efforts as described above in this report, China Mobile has determined the following Product to be "DRC conflict free" for the Reporting Period:

**Product/Model**  
CM101

**Description**  
Set-Top Box

The supplier of the Product listed above has identified the smelters and refiners in the supply chain that are sources of the necessary conflict minerals for the Product listed above. All of these smelters and refiners have received a “conflict free” designation from CFSP, and as a result of this finding, China Mobile came to its reasonable determination that the Product listed above is DRC conflict free.

China Mobile is unable to determine the source of the conflict minerals used in the following Products that it has contracted to be manufactured by third parties:

**Product/Model**  
A1  
N1  
N1 Max  
CM421

**Description**  
Mobile Phone  
Mobile Phone  
Mobile Phone  
In-ear Earphone

China Mobile’s efforts to determine the mine or location of origin with the greatest possible specificity are part of its due diligence, as described above in this report. Based on the information provided by suppliers, China Mobile believes that the facilities used to process the necessary conflict minerals in Products include the smelters and refiners listed in Annex I below.

Based on the due diligence efforts as described above in this report, China Mobile was not able to obtain sufficient information to conclusively determine the countries of origin of the necessary conflict minerals in its four Products mentioned above or whether such necessary conflict minerals are from recycled or scrap sources. However, based on the information provided by suppliers, China Mobile believes that the countries of origin of the necessary conflict minerals contained in its products include the countries listed in Annex II below, as well as recycled and scrap sources.

## Annex I

<u>METAL</u>	<u>SMELTER OR REFINER NAME</u>	<u>LOCATION OF FACILITY</u>	<u>CONFLICT-FREE Status<sup>1</sup></u>

#### **IV. Independent Private Sector Audit**

China Mobile obtained an independent private sector audit of this report by Ernst & Young Hua Ming LLP, which is set forth as Exhibit A to this report.

**Report of Independent Accountants**

Board of Directors and Stockholders of China Mobile Limited

We have examined whether the design of China Mobile Limited's (the "Company") due diligence framework as set forth in the Design of Due Diligence section of the Conflict Minerals Report for the reporting period from January 1 to December 31, 2015, is in conformity, in all material respects, with the criteria set forth in the Organization for Economic Co-operation and Development *Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas*, Second Edition 2013 ("OECD Due Diligence Guidance"), and whether the Company's description of the due diligence measures it performed, as set forth in the Due Diligence Measures section of the Conflict Minerals Report for the reporting period from January 1 to December 31, 2015, is consistent, in all material respects, with the due diligence process that the Company undertook.

Management is responsible for the design of the Company's due diligence, the description of the Company's due diligence measures set forth in the Conflict Minerals Report, and performance of the due diligence measures. Our responsibility is to express an opinion on the design of the Company's due diligence framework and on the description of the due diligence measures the Company performed, based on our examination. Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants and the standards applicable to attestation engagements contained in *Government Auditing Standards*, issued by the Comptroller General of the United States, and, accordingly, included examining, on a test basis, evidence about the design of the Company's due diligence framework and the description of the due diligence measures the Company performed, and performing such other procedures as we considered necessary in the circumstances. We believe that our examination provides a reasonable basis for our opinion.

Our examination was not conducted for the purpose of evaluating:

- The consistency of the due diligence measures that the Company performed with either the design of the Company's due diligence framework or the OECD Due Diligence Guidance
- The completeness of the Company's description of the due diligence measures performed
- The suitability of the design or operating effectiveness of the Company's due diligence process
- Whether a third party can determine from the Conflict Minerals Report if the due diligence measures the Company performed are consistent with the OECD Due Diligence Guidance
- The Company's reasonable country of origin inquiry (RCOI), including the suitability of the design of the RCOI, its operating effectiveness, or the results thereof
- The Company's conclusions about the source or chain of custody of its conflict minerals, those products subject to due diligence, or the DRC Conflict Free status of its products

Accordingly, we do not express an opinion or any other form of assurance on the aforementioned matters or any other matters included in any section of the Conflict Minerals Report other than the design of the Company's due diligence framework as set forth in the Design of Due Diligence section and the Company's description of the due diligence measures it performed, as set forth in Due Diligence Measures section referenced in the first paragraph above.

In our opinion, the design of the Company's due diligence framework for the reporting period from January 1 to December 31, 2015, as set forth in the Design of Due Diligence section of the Conflict Minerals Report is in conformity, in all material respects, with the OECD Due Diligence Guidance, and the Company's description of the due diligence measures it performed as set forth in the Design of Due Diligence section of the Conflict Minerals Report for the reporting period from January 1 to December 31, 2015, is consistent, in all material respects, with the due diligence process that the Company undertook based on the criteria.
